PROJECT SPECIFICATION SHEET

Flat-bottom pouch for dry pet food

Complete the fields for your sample. Material values and performance are confirmed for each project.

Kerui flat-bottom pouch samples · side gussets and rectangular base.

Printing and order size

Plate-free, digital or gravure. Plate-free orders start above 1,000 bags. Digital sampling starts at one piece. For gravure, divide 3,000 m or 6,000 m by the bag width in metres.

Material selection

One fixed plate-free option is matte film / paper / metallized film / PE. Dry pet food and required shelf life guide the final structure.

Sample specification record

Specification	Project value or target
Sample or project reference	
Face width × height (mm)	
Side gusset and opened base (mm)	
Food / actual fill weight (g or kg)	
Layers, outside to inside / total thickness (µm)	
Closure / finish / order quantity (bags)	

> **What to check on the sample**
>
> State whether the gusset was measured folded or open. Trial-fill the pouch with the intended kibble to verify the usable capacity. Barrier target or report: OTR / WVTR, units, test method, temperature and humidity.

Trial date, reference and observations
