PROJECT SPECIFICATION SHEET

Retort pouch for wet pet food

Complete the fields for your sample. Material values and performance are confirmed for each project.

Format diagram · three sealed edges and a filling opening.

Printing and order size

Gravure printing. The first order requires a plate fee. The bag minimum is the half-roll (3,000 m) or full-roll length (6,000 m) divided by bag width in metres.

Material selection

A clear or foil laminate may be assessed for the recipe, sealing equipment and retort cycle. Record the validated structure and trial reference for the chosen pack.

Sample specification record

Specification	Project value or target
Sample or project reference	
Finished width × height / seal width (mm)	
Recipe / fill weight / fill temperature	
Retort temperature (°C) / holding time (min)	
Layers, outside to inside / total thickness (µm)	
Seal and retort trial / report reference	

What to check on the sample

Provide the intended heating and cooling cycle. Validate the filled and sealed sample under the actual process before confirming production.

Trial date, reference and observations
