PROJECT SPECIFICATION SHEET

Rollstock for food packing lines

Complete the fields for your sample. Material values and performance are confirmed for each project.

Kerui printed food rollstock · pecan artwork.

Printing and order size

Gravure printing. The first order requires a plate fee. Order by length: 3,000 m for a half roll or 6,000 m for a full roll.

Material selection

The laminate is selected for the food, target shelf life and heat-sealing system. Supply the packing line's web drawing and operating limits.

Sample specification record

Specification	Project value or target
Sample or project reference	
Web width / print repeat (mm)	
Core inside diameter / maximum roll diameter (mm)	
Unwind direction / print orientation / eye mark	
Layers, outside to inside / total thickness (µm)	
Heat-seal settings / line speed / order length (m)	

What to check on the sample

Check the print repeat and registration mark against the line drawing. Verify unwind direction and seals on the actual machine.
